LinkedIn (/in/mostafa-rawash) | **GitHub** (/Mostafa-rawash)

A highly motivated and results-oriented software engineer with a proven track record of developing and deploying scalable, reliable solutions. Passionate about automating processes, I leverage my expertise in Python, Node.js, MERN stack, and DevOps technologies to deliver impactful solutions. I'm eager to contribute my skills in a dynamic environment, continuously learning, and collaborating to achieve impactful results.

Education:

Modern Academy – Bachelor of Computer Science (B.Sc.)

Aug. 2018 – May 2022

Accumulative GPA: 3.17 (Very Good – 79.5%)

Graduation Project: Betrend – SaaS Web Application connected with AI model (Degree: A+).

Key Courses: OOP, Data Structures and Algorithms, Advanced Logic Design, Database Management Systems, Operating Systems, and others.

Technical skills:

Languages: Node.JS, JavaScript, Python, PHP, C++, SQL .

Front-end: React.js, Jinja, HTML, CSS, Bootstrap, SCSS, Tailwind, DaisyUI, Preline .

Back-end: Express.js, WordPress, Flask, RESTful API, Postman, Frappe Framework, Flask APIs .

Databases: MongoDB, MySQL, MariaDB, SQLite3, PostgreSQL .

DevOps: Docker, Git/Version Control, Agile Methodologies, Jenkins, Kubernetes (K8s), CI/CD Pipelines .

Design: Figma, Adobe XD, Bootstrap Studio .

Work Experience:

Software Engineer | ensoulify

Mar. 2021 – Nov. 2024

- Developed and maintained front-end applications using CSS, SASS, Tailwind, DaisyUI, and Preline, resulting in a 15% reduction in development time.
- Implemented efficient back-end solutions using Python and the Frappe framework, integrating Python code with Facebook API to enhance user experience.
- Optimized WordPress themes for improved performance and user experience, leading to a 20% increase in website speed.
- Managed and maintained the ERPNext system on the company's private servers, ensuring smooth scalability and high availability.
- Implemented server infrastructure automation using Docker and Kubernetes, improving deployment speed by 30% and reducing manual intervention.

- Developed custom applications and modules within the Frappe framework to meet specific business needs, contributing to a 10% increase in system functionality.

WordPress Developer & Project Coordinator | Qayedny – part time Jul. 2024 – Aug. 2024

- Optimized website functionality and ensured responsive design across 20+ pages.
- Improved site performance, UX, and streamlined the registration flow, resulting in a 15% increase in user engagement.
- Trained team on Jira and improved organizational processes, leading to a 10% reduction in project completion time.
- Edited theme to align with brand identity and boost site performance, resulting in a 5% increase in conversion rates.

Senior WordPress Developer | TechVillageEG – part time Apr. 2024 – May 2024

- Developed custom plugins to enhance site performance and user experience, leading to a 10% increase in page load speed.
- Optimized performance for a site with 63 active plugins, resulting in a 20% reduction in server load.
- Collaborated on code quality, design consistency, and SEO, contributing to a 15% increase in organic traffic.

Front-end Developer | BMA – Brand Maker Agency Jan. 2020 – May 2021

- Built and managed responsive WordPress sites, ensuring brand consistency.
- Optimized site speed and performance via caching and image optimization, leading to a 20% reduction in page load time.
- Automated content management with WP-CLI, saving 10 hours weekly.
- Architected a secure e-commerce platform, increasing sales by 90%.

Projects:

DevOps & Full-tack Developer | DEPI Final Project Aug. 2024 –Oct. 2024

- Built a Dockerized Django application, focusing on containerization and scalable web architecture, as part of a team project.
- Implemented CI/CD pipelines with Jenkins, reducing manual intervention in deployment by 25%.
- Assisted in configuring and managing Kubernetes for container orchestration, ensuring smooth scalability and high availability.
- Optimized backend services, API integrations, and database management for performance and reliability, contributing to a 15% reduction in application response time.

Team Lead & Full-Stack Developer | Betrend Jan. 2022 –Feb. 2022

- Developed a full-stack web application using the Frappe framework, hosted on an Oracle server, and accessible on both websites and Android devices.
- Led a 4-member team using Jira for project management, ensuring timely milestone delivery.

- Designed system architecture, workflows, and UI/UX; created wireframes and project documentation in Adobe XD.

Facebook API Integration Project – Freelance

Feb. 2021

- Collected and managed Facebook users' interests and the audience size for each interest, working with over 82,000 data points.
- Integrated Facebook API to automate data collection, enhancing efficiency and accuracy by 15%.
- Managed large datasets in MongoDB Atlas, ensuring data consistency and integrity.
- Documented the process, enabling future maintenance and easy integration of additional features.

Volunteering Experience:

GDSC Member | GDSC Modern Academy

Oct. 2019 – Aug. 2020

International Micromouse Competition | IEEE HTI Student Branch

Jul. 2019 – Jun. 2019

PM Coordinator | Enactus Modern Academy

Oct. 2018 – Aug. 2019

Courses:

DevOps Engineer | DEPI Egypt

Innov Egypt | TIEC

React Course | Scrimba

Arduino Course | IEEE HTI
